Projects

ShipPacks

<https://shippacks.com/>

A logistics solution for seamless package delivery and tracking.

- This project utilizes Next.js, Firebase, and Tailwind CSS, allowing users to place and track orders in real time. Drivers can update order statuses via a mobile app, keeping users informed on their order progress.

Data AI

<https://framerwebsite-blush.vercel.app/>

An advanced analytics platform for AI-driven insights and visualization.

- This analytics platform utilizes advanced AI to provide insightful visualizations. Built with Next.js, Tailwind CSS, and Framer Motion, it features an intuitive dark-themed interface that enhances user engagement and facilitates smooth navigation of data-driven insights.

ChatTick Admin

<https://chattickadmin.vercel.app/>

A powerful admin panel for managing a SaaS-based chat application.

- This is the admin panel of a chat application, a SaaS product with end-to-end encryption for user privacy. Administrators can view statistics, add mobile app themes, and manage contests and gifts.
